

Whole School Home Learning

Week Beginning 6th July

Hello everyone!

Can you believe it is time for Week 6 already?! Here are some more ideas and activities for you to get stuck into at home. We will definitely try some of them out at school and we're so excited to see what you get up to too! Some of the photographs from last week were amazing - the crowns, the bird feeders, the potato stampers and bird watching - it was so lovely to see you having so much fun!

Remember, you can all see all of these photos on the 'Home-School Project - Work Shared' page. We hope that you have enjoyed the activities that we suggested as part of the project and we have set out some new ideas below. Remember these are all optional and are only suggestions. Please do what you can and share a photograph with us via Miss Robey by Thursday evening if you would like it to be shared on our website!

Have fun and we're so excited to see what you get up to once again...

Research and Present:

What is your favourite animal? Find out fun facts about your favourite animal/s and design a factfile or poster to share our work. Perhaps you like wandering whales, wriggly worms, polar penguins or crazy koalas...

National Geographic have lots of animal facts on this page that are easy for children to read and navigate
www.natgeokids.com/uk/category/discover/animals/

Use your nature notebook - If you made a nature notebook last week why not put your fascinating facts in it?

Learn to draw an animal - Maybe you fancy a go at drawing a slippery snake or if you want a challenge why not have a go at drawing a whale shark? - see our attached 'how to...' activities or make an origami frog hopper!

Make:

Make a footprint trap to discover which curious creature visit your garden overnight!

How to make an animal footprint trap

You will need:

- old baking tray
- long ruler
- fine grain sand
- water
- low-sided dish
- meaty cat or dog food
- footprint ID guide

1 Fill an old baking tray with damp sand and smooth out the surface with a ruler.

Check to make sure your fingers leave a mark.

2 Place hedgehog food or meaty cat or dog food in a low-sided dish in the middle of the tray.

(you could also try mealworms or chopped, unsalted peanuts)

3 Leave the trap overnight in a garden and check in the morning for footprints left by curious visitors.

Draw a Wild Landscape:

Get your painting shirt on! - Don your painting shirt, grab some paints and paper and go outside to paint a wild landscape. You could make a bigger viewfinder like the one last week and use it to help you focus on your view, or get wild and create your own interpretation! The wilder and messier the better!

Or if you fancy something a little calmer, how about a bit of butterfly symmetry?

(see attached)

Make a butterfly painting

Decorate:

Get creative and make a mobile! Use the following instructions to make this style of mobile, or be even more creative and design your own. Perhaps you can hang it from a tree like the activity below, or use it as decoration elsewhere in your summer garden.

(see attached)

Paint a leaf! Paint some leaves and leave them to dry before you make your own colour creation.

Use coloured twines or wool to wrap around the hanger.

Decorate a tree
