## Where in the World? Hot and cold places

### By the end of this topic I will...

- name and locate the world's seven continents and five oceans
- find hot and cold areas of the world
- find the North and South Poles and the Equator
- locate the North and South Poles and the Equator using maps, atlases, globes and Google Earth

### Links to the National Curriculum:

- name and locate the world's seven continents and five oceans
- locate hot and cold areas of the world in relation to the Equator and the North and South Poles
- use world maps, atlases and globes to identify these regions

### What do I already know?

- there are hot and cold places in the world
- the weather changes throughout the year
- temperature is how hot or cold somewhere is
